Submitting BRP RISE Data

If you participate in the BRP RISE program you are now able to submit the RISE Financials to BRP through our integration.

1. Ensure that in **System – Security** your user has the **General Ledger – Reports – Lightspeed Financials Export** function checked to enable access.
2. Go to the **General Ledger – Reports – Lightspeed Financials Export** menu.

3. In the **OEM** field select **BRP**. Select the month and year to report. To report for an individual store make your selection using the **Store** dropdown menu. Then click the **Transmit** button to send the data.

4. You will see a confirmation dialog telling you the data was successfully sent when the transmission is completed.
